

SCENARIO-BASED TRAINING

MOBILE TRAINING PROGRAMS

NIPSTA presents this new opportunity for police departments to participate in scenario-based training within their own community, on days and times that are convenient to them. Sessions involve firearms which employ marking ammunition and use personal protective equipment in force-on-force situations, all which is provided by NIPSTA. Participants will learn proper techniques to be utilized in high-risk environments, but in a safe, controlled setting.

Available training programs include:

- ◆ Vehicle Stops: Unknown Risk & Immediate Threats
- ◆ Building Search & Room Entry
- ◆ General Arrest Encounters

The lessons are delivered by instructors who are experienced in the field and able to convey best practices to use in tactical situations. The number of participants is limited each session to allow for a significant amount of interaction and role-playing in each session.

The mobile training programs provide many benefits to departments:

- ◆ Convenient and economical
- ◆ Flexible calendar to meet your departments scheduling demands
- ◆ Equipment, lesson plans, and instructors provided by NIPSTA
- ◆ Customizable training programs to meet your training needs
- ◆ Experienced law enforcement trainers
- ◆ Safe and reliable equipment

Your department will only need to provide the training venue!
